ABOUT

Experienced Full Stack Web Developer and Team Lead with over 5 years of experience in designing, developing, and maintaining scalable web applications using Laravel, PHP, MySQL, Vue.js, JavaScript, and modern web technologies.

Proven expertise in leading development teams, architecting backend systems, developing RESTful APIs, integrating third-party services, optimizing application performance, and managing production environments.

WORK EXPERIENCE

- ★ **Team Lead - Full Stack Web Developer**
Acetrot | Feb 2023 - Present
 - Led a six-person development team, ensuring effective collaboration and successful project execution.
 - Communicated with clients and stakeholders to understand project requirements and ensure smooth completion.
- ★ **Full Stack Web Developer**
Acetrot | Feb 2022 - Feb 2023
 - Designed databases for new web applications and tailored them to specific requirements.
 - Integrated commercial websites with the Razorpay Payment Gateway for streamlined payment processes. Utilized Amazon Web Services, including RDS, S3, and SES, as needed for various websites.
 - Effectively managed production and staging web applications on servers through Laravel Forge.
- ★ **Jr. Backend Developer**
Acetrot | Feb 2021 - Feb 2022
 - Developed web applications using Laravel, adhering to MVC project structure, PHP, and MySQL, to meet specific client requirements.
 - Collaborated with the app development team to design and implement RESTful APIs for various projects.
 - Worked on conditional rendering, and the creation of complex, interactive forms using technologies such as Livewire and Vue.js to enhance user interactivity.
 - Additionally, I gained valuable experience in agile development methodologies and version control systems.
- ★ **Customer Support Executive (Part Time)**
HGS
 - Offered support and resolved customer queries through the Support Department
